

REMIND Lab - Functional Requirements Specification

MVP v0.1 | Formal functional baseline

1. Purpose

This Software Requirements Specification defines the functional behavior currently approved for the REMIND Lab MVP. It specifies what the system must do without prescribing endpoints, frameworks, persistence technology or architectural patterns.

2. Conventions

MUST identifies behavior required for the MVP. Requirement IDs are stable references for implementation, tests, ADRs and change requests.

3. Functional requirements

ID	Capability	Requirement	Actor	Priority
FR-001	User profile	Allow an authenticated User to edit their own profile information.	User	MUST
FR-002	Create report	Allow an authenticated User to create an EmergencyReport with title, description, location, category and severity.	User	MUST
FR-003	Initial status	Assign OPEN automatically to every newly created EmergencyReport.	System	MUST
FR-004	Ownership	Associate each EmergencyReport with the authenticated User who created it.	System	MUST
FR-005	View own report	Allow a User to view reports authored by that User.	User	MUST
FR-006	Own history	Allow a User to list the history of reports authored by that User.	User	MUST
FR-007	Change severity	Allow the author to change severity while the report is OPEN or IN_PROGRESS.	User	MUST
FR-008	Cancel OPEN	Allow the author to transition an OPEN report to CANCELLED.	User	MUST
FR-009	Cancel IN_PROGRESS	Allow the author to transition an IN_PROGRESS report to CANCELLED without deleting its history.	User	MUST
FR-010	Company profile	Allow a Company to edit its permitted profile information.	Company	MUST
FR-011	Company categories	Associate each Company with one or more emergency categories it is authorized to handle.	Admin / policy	MUST
FR-012	Eligible feed	Allow a Company to view OPEN reports whose category matches a category handled by that Company.	Company	MUST
FR-013	View eligible report	Allow an eligible Company to view details required to evaluate an OPEN report.	Company	MUST
FR-014	Assume report	Allow an eligible Company to assume an OPEN report, transitioning it to IN_PROGRESS.	Company	MUST
FR-015	Single company	Prevent more than one Company from becoming responsible for the same report at the same time.	System	MUST
FR-016	Resolve report	Allow only the assigned Company to transition an IN_PROGRESS report to RESOLVED.	Company	MUST
FR-017	Response information	Allow the assigned Company to record response information for an occurrence it handled.	Company	MUST

ID	Capability	Requirement	Actor	Priority
FR-018	Company history	Allow a Company to list reports handled by that Company.	Company	MUST
FR-019	Manage users	Allow an Admin to create, retrieve, edit and administratively manage Users.	Admin	MUST
FR-020	Manage companies	Allow an Admin to create, retrieve, edit and administratively manage Companies.	Admin	MUST
FR-021	Terminal states	Reject attempts to reopen RESOLVED or CANCELLED reports.	System	MUST
FR-022	Cancellation history	Cancelling a report shall not physically delete the report or its operational history.	System	MUST

4. Approved constraints

- Initial categories: MEDICAL, FIRE, CRIME and ACCIDENT.
- Status and severity are independent concepts.
- Title, description, location and category are immutable after creation in the current MVP; severity remains mutable while active.
- CANCELLED and RESOLVED are terminal states.
- Deletion is not equivalent to cancellation.

5. Open decisions

- Exact severity values and whether severity may decrease.
- Required fields and completion timing of ResponseReport.
- Whether IN_PROGRESS cancellation requires a reason.
- Exact administrative deletion/deactivation policy.
